Relief for female urological problems.

People often mistakenly think of urology as dedicated solely to male disorders. At the ETMC Urology Institute, we are acutely aware of the urological problems that women regularly face, and are trained to diagnose and treat them in a relaxed environment that promotes comfort and personal dignity.

Urological disorders most prevalent in females include:

- Recurrent urinary tract infection
- Urinary incontinence causing involuntary leakage
- Voiding dysfunction, such as urinary urgency, frequency and/or inability to empty the bladder
- Interstitial cystitis, causing discomfort or pain in the bladder and surrounding pelvic region
- Urethritis, inflammation of the urethra
- Urethral syndrome involving irritative bladder symptoms
- Pelvic floor dysfunction causing pelvic pain, urinary problems and constipation
- Pelvic pain

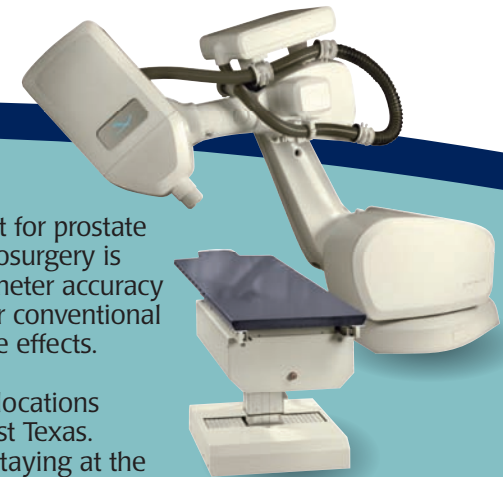

Life-enhancing and lifesaving help for prostate disease.

The ETMC Urology Institute excels in the diagnosis and treatment of benign and malignant prostate diseases. Whether you face the problems of enlarged prostate or prostate cancer, you're in the right place to receive the most sophisticated medical help available.

A complete range of treatments for prostate cancer.

Working in close partnership with the acclaimed ETMC Cancer Institute, urologists and oncologists offer a full spectrum of radiation treatment options for prostate cancer, including:

- Hormone therapy
- Brachytherapy
- Intensity modulated radiation therapy (IMRT)
- Surgical options
- CyberKnife® stereotactic radiosurgery

As the most revolutionary treatment for prostate cancer, CyberKnife stereotactic radiosurgery is able to target tumors with submillimeter accuracy in a fraction of the time required for conventional treatments—all with virtually no side effects.

CyberKnife is available in very few locations nationwide and nowhere else in East Texas. It's part of ETMC's commitment to staying at the forefront of advancements in cancer treatment in order to achieve the best outcome for every patient.

The ETMC Urology Institute provides life-enhancing and lifesaving treatments for urological disorders and diseases that affect men, women and children.

The discomfort and difficulties related to urological problems like incontinence, kidney stones and infertility can have a serious impact on your quality of life. Other urological conditions like bladder, kidney and prostate cancer can be life threatening.

That's why the ETMC Urology Institute has combined expert physicians and advanced technology to offer a new level of urology care in East Texas. Patients and referring physicians alike gain from our wide array of services, all centrally located.

Whether it's life-enhancing treatment or lifesaving treatment, the ETMC Urology Institute has the expert staff, the services and the technology to meet your needs.
