

# Heart Failure Is Not An Option.

***That's how we see it at  
the newly accredited  
ETMC Chest Pain Center—  
and we're committed to doing  
all we can to lessen the  
incidence of heart failure  
in East Texas.***

***As part of this commitment:***

We've recently become accredited by meeting stringent standards set forth by the Accreditation Review Committee of the Society of Chest Pain Centers.

We've combined advanced training, experienced professionals, streamlined procedures and state-of-the-art technology to promote optimal patient care.

We've created the region's most advanced EMS system that's fully integrated with our Level I trauma center to rapidly access, diagnose and treat patients.

We've invested in educating East Texas citizens about the prevention of heart disease, the warning signs of heart attack and what to do in case of a heart attack.

*And we're not stopping until heart failure is no longer an option in East Texas.*

***East Texas Medical Center  
Regional Healthcare System***

A not-for-profit organization committed to improving the quality of life in East Texas communities.
